To the editor:
We read with interest the recent article1 in the New York Times reporting on undisclosed financial ties in a Nature Neuroscience review article on treatments for mood disorders2. According to the Times article, Nature’s policy permitted the author of the review to remain silent about his patent and other significant financial interests in treatments praised in his review.

In February 2002, the Center for Science in the Public Interest and two dozen prominent scientists wrote a letter urging the journals to strengthen their policies and procedures regarding conflicts of interest. A lengthy story3 about the issues raised in that letter was published in the March 28, 2002 issue of Nature.

Among other things, that article pointed out that Nature’s policy was weaker than a number of its peer publications. You will be interested to know that despite the fact that it was cited as having one of the strongest policies, The Proceedings of the National Academy of Sciences has taken additional steps to improve its policy4, by explicitly expanding the disclosure requirement to “all authors, members, referees, and editors” — be they authors of letters, review articles, or editorials. Particularly in light of the New York Times article, the undersigned urge you to revisit our recommendations and establish a more robust policy that requires (i) mandatory disclosure of conflicts of interest for all authors, referees, and editors, (ii) mandatory disclosure of all information regarding the specific contributions of authors, (iii) publication of those disclosures, and (iv) rejection of submissions where authors’ conflicts are incompatible with integrity in science. Such a policy is a necessary safeguard against potential bias and would ensure that your readers have sufficient information to evaluate the studies, commentary, reviews, letters, and other statements made in the pages of the Nature journals.

Michael F Jacobson

Virginia A Sharpe
Director, Project on Integrity in Science, Center for Science in the Public Interest, 1875 Connecticut Avenue NW #300, Washington, DC 20009, USA.

On behalf of:
Marcia Angell, Senior Lecturer in Social Medicine, Harvard Medical School; Former Editor-in-Chief, New England Journal of Medicine
Nicholas A Ashford, Professor of Technology and Policy, Massachusetts Institute of Technology
Alan Blum, Professor and Endowed Chair in Family Medicine and Director, The University of Alabama Center for the Study of Tobacco and Society, University of Alabama; Former Editor-in-Chief, Medical Journal of Australia and New York State Journal of Medicine
Lin Kaatz Chary, Great Lakes Center for Occupational and Environmental Safety and Health, School of Public Health, University of Illinois at Chicago
Mildred Cho, Senior Research Scholar and Acting Co-Director, Stanford Center for Biomedical Ethics, Stanford University
Bruce C Coull, Carolina Distinguished Professor and Dean, School of the Environment, University of South Carolina
Deva Davis, Visiting Professor, Heinz School of Public Policy and Management, Carnegie Mellon University; Senior Advisor to the World Health Organization
Russell F Doolittle, Center for Molecular Genetics, University of California, San Diego
David Egilman, Clinical Associate Professor, Department of Community Health, Brown University
Samuel S Epstein, Professor Emeritus, Environmental & Occupational Medicine, School of Public Health, University of Illinois at Chicago; Chairman, Cancer Prevention Coalition
Morris Greenberg, London, England
Kim Hooper, Hazardous Materials Laboratory, Department of Toxic Substances Control, California EPA
James Huff, Senior Investigator, National Institute of Environmental Health Sciences
Tushar K Joshi, Head, Centre for Occupational and Environmental Health, Lok Nayak Hospital, New Delhi, India

Sheldon Krimsky, Professor, Department of Urban & Environmental Policy & Planning, Tufts University
Joseph LaDou, Department of Medicine, University of California School of Medicine, San Francisco
Charles Levenstein, Professor of Work Environment, University of Massachusetts, Lowell
Steven Miles, Professor of Medicine, Center for Bioethics, University of Minnesota
Herbert Needleman, Professor of Psychiatry and Pediatrics, University of Pittsburgh School of Medicine
Edmund D Pellegrino, Professor Emeritus of Medicine and Medical Ethics, Georgetown University Medical Center
Bill Ravanesi, Boston Campaign Director, Health Care Without Harm
Jennifer Sass, Senior Scientist, Natural Resources Defense Council
Arnold Schecter, Professor of Environmental Sciences, University of Texas School of Public Health
Jill S Schneiderman, Professor of Geology, Vassar College
David Schubert, Professor, Salk Institute for Biological Studies
Morando Soffritti, Scientific Director, European Ramazzini Foundation of Oncology and Environmental Sciences, Bologna, Italy
David Suzuki, Professor Emeritus, Sustainable Development Research Institute, University of British Columbia
Tim K Takaro, Occupational and Environmental Medicine, University of Washington
Norman J Temple, Associate Professor of Nutrition, Centre for Science, Athabasca (Alberta) University
Benedetto Terracini, Professor of Biostatistics (retired), University of Torino, Italy
Andrew Thompson, Associate Professor (retired), University Counseling Center and Department of Counseling Psychology, University of Oregon
David Wallinga, Antibiotic Resistance Project Director, Institute for Agriculture and Trade Policy
Steven Wing, Associate Professor, Department of Epidemiology, School of Public Health, University of North Carolina

Editor’s Footnote:
Drs. Nemeroff and Owens are correct in stating that Nature Neuroscience’s policy for review articles (in contrast to primary research) did not require them to make a financial disclosure and that we did not ask them to do so. We are now changing our policy, for reasons that are discussed in the editorial on page 997.
